

Stage Plan

Specification

- The overall stage area is approx 55 square metres
- The stage height is approx 1m dependent on level ground
- The Stage Truck is 17m long with the unit and 14m long without
- The on-the-road width is 2.6m
- The height of the Stage Truck trailer is approximately 4.25m
- The weight of the Stage Truck is approximately 26,000kg

Requirements

- The site should be level and have good access. The route to the site needs to be checked for weight, height & width restrictions and any permission required for the route and access
- Entrances & roads, if straight, must be at least 3m wide and 4m wide if there are bends. To turn 90 degrees into a 4m entrance the approach road to the entrance must be at least 10m wide

- Suitable surfaces are tarmac, concrete or grass where the sub soil is very firm. The Stage Truck driver will take the decision whether it is safe to drive off road. For this reason, it is worth having a back up plan if using a grass surface. This could be the car park at the edge of a park or hiring in a temporary roadway
- The site must be available 3 hours before sound checks are required. The pack down takes approximately 3 hours from the time the audience leave the area
- The amount and type of stewards required is event and location specific, and is the responsibility of the event organiser. We can provide contacts and recommendations when needed
- The Stage Truck needs to be surrounded by crowd barrier which is the responsibility of the event organiser. The barrier keeps people away from the stage and technical areas making the area easier to secure. We recommend 35 metres of 1 metre high pedestrian barrier for the front and sides of the Stage Truck and 15 metres of 2 metre high site fencing for the back of the Stage Truck. The barrier/fencing should be delivered to site before the Stage Truck is due to arrive and should not be removed until the Stage Truck has left
- Local organisers must ensure that the relevant permissions and licences for the event are in place
- Our public liability insurance will cover all aspects of the Stage Truck and equipment. The local organisers must put in place the liability insurance to cover the wider event
- Certain weather conditions may compromise safety or potentially damage equipment. In such an eventuality our crew chief will take the necessary steps, which may include bringing a halt to the event. No refund can be given in these circumstances
